

Exception

```
classDiagram
    class Exception {
    }
    class exceptions_SqrtNegExeption {
    }
    Exception <|-- exceptions_SqrtNegExeption
```

The diagram illustrates a class hierarchy. At the top is a class box for 'Exception', which is divided into three horizontal sections: the top section contains the class name, and the two bottom sections are empty. Below it is a class box for 'exceptions.SqrtNegExeption', which is a shaded rectangle divided into three horizontal sections. The top section contains the class name, the middle section is empty, and the bottom section contains the method signature '+ SqrtNegExeption()'. A blue arrow with an open triangular head points from the top of the 'exceptions.SqrtNegExeption' box to the bottom of the 'Exception' box, indicating that 'exceptions.SqrtNegExeption' inherits from 'Exception'.

exceptions.SqrtNegExeption

+ SqrtNegExeption()
